

Short term rental owners requesting deferment on water fees, this applies to rentals of less than 30 days. There is the option of seeking a long-term renter for your properties, for which based on news reports, there is a shortage in the county.

Since over 70% of the properties in our service area are either second homes or vacation rentals, we charge a fixed quarterly fee which allows for a certain amount of water.

You could request that your water service be disconnected, however our policy requires that you would have to pay all previous quarters, late fees and interest before the water would be turned back on.

Financially we work on a very tight budget which requires every customer to pay for their water service in a timely manner. As such we are not able to defer your water fees as requested.
